

We are writing to state our opposition to the proposed FCC reg's regarding Low Power FM (LPFM) and the possible damage this measure could have upon radio stations in the San Antonio and surrounding areas. In particular, radio station K-LOVE, which is broadcast via FM translator into the area, is subject to this proposed measure. Radio station K-LOVE provides family friendly music with an inspiring message, unlike many of the public stations playing rap, rock and who knows what else. The stations employees (DJ's) do not swear, make lewd comments or deprecate those things which I do not want my family to be exposed to. If this station were to be replaced by an LPFM station, we could not be assured of one that didn't turn out to be just as shocking or disgusting as what is offered on most of the stations presently. We feel that the service provided by K-LOVE in this area gives those, like my family, an alternative to the vile, putrid and distasteful commentary, musical lyrics and sex driven agendas that permeate the airwaves. Please do not disturb the balance as it is. Keep K-LOVE and other stations like it on the air.

Sincerely,  
Steve & Kennon Payne
